## MESSAGE

Global shifts in energy demand-supply matrix besides rapid advances in technology are transforming our energy market dynamics. It is a new world with different agencies at work with different priorities. But the need for energy is going to be a constant through all the changes.

So, as an oil and gas operator in one of the most energy-hungry economies on the globe, there are many opportunities in this evolving scenario. Under the visionary leadership of our Hon'ble Prime Minister, India is recalibrating its strategy in the energy sector to meet new challenges.

The 13<sup>th</sup> edition of the Petrotech series of International Oil & Gas Conference and Exhibition - '**PETROTECH-2019**' - presents a huge opportunity to connect with all stakeholders and rejuvenate the Energy ecosystem. Since 1995, the biennial conference has evolved as a flagship event of the Indian hydrocarbon industry under the aegis of the Ministry of Petroleum and Natural Gas, Government of India. It is one of the largest events of its kind in this part of the world, with expected participation of over 7000 delegates and around 700 exhibitors and shall host industry-relevant deliberations in addition to showcasing latest technologies.

The theme of Petrotech-2019 is quite opportune - '**Shaping the new energy world through Innovation & Collaboration**'. I am optimistic that this 13<sup>th</sup> Petrotech, scheduled during 10-12 February, 2019 in New Delhi, would continue its tradition of providing a global forum for stakeholders' commitment, synergy among energy producing and consuming nations leading to sustainable growth in the energy sector.

It gives me immense pleasure to welcome participants from across the world to the 13<sup>th</sup> International Oil & Gas Petrotech Conference and Exhibition. My best wishes to all for purposeful discussions and meaningful collaborations for a brighter tomorrow.
